LIGHTED INSECT TRAP

General

Please read these instructions carefully before using & installing your Lighted Insect Trap. Store & keep these instructions in a safe place for future reference. Any changes & modifications done to the unit might make it unsafe to use. It may also cause damage or personal injury to modify the unit.

How Indoor Flying Insect Trap works

Stop flying insects from taking over your home with the Lighted Insect Trap. Our innovative device features a warm UV Light that lures & attracts flies, [REDACTED] & other insects to a sticky trap attached to it. The ultra strong sticky pad captures flying insects for good, stopping them from bugging you & your family. Free of harsh chemicals, the Lighted Insect Trap is an efficient insect eliminator that is people & pet friendly. Plus, it's designed with a plug making it a versatile device suited for any standard outlet in your home. 24/7 protection for you & your family!

Warnings

- Read all the instructions before using the appliance.
- To reduce the risk of injury, close supervision is necessary when the appliance is used near children.

Instructions pertaining to a risk of fire, electric shock, or injury to persons:

- Do not use outdoors, household & indoor use only.
- To reduce the risk of electrical shock, do not put the body of appliance in water or other liquid.
- Do not place the device near flammable materials.
- Do not place or store appliance where it can fall or be pulled into a tub or sink.
- To disconnect the device, carefully remove it from the power outlet.
- For safe use, plug the device only into exposed wall outlets where it is well ventilated and cannot be covered by other materials.
- Do not use the device if it has a damaged plug, the device is not working properly, has been dropped or damaged, or if it has been dropped into water or any other type of liquid.
- Do not clean or spray the unit with water, cleaning spray or any other type of liquid.
- Do not plug the device into an extension cord.
- To reduce the risk of electric shock, unplug before cleaning or servicing.
- This appliance is to be connected to a circuit operating at 150V or less to ground.
- Collected insects from the unit may cause fire hazards, replace the sticky pad as often as needed.
- Only use attachments recommended or sold by the manufacturer.

Operating Instructions

Please read all instructions before using the Lighted Insect Trap & keep for future reference.

- Slide in removable sticky pad to the back of the unit.
- Plug the device into an indoor outlet.
- When the sticky pad is full, unplug device, remove pad from the back and toss. Then replace with a new pad.

User-Maintenance Instructions

- For best results, leave unit plugged in at all times, except when replacing the sticky pad.
- If cleaning the unit is desired, unplug the unit, then wipe down with a damp cloth. Wait until unit is fully dry before plugging back in.

How to use Lighted Insect Trap

1. Remove the adhesive liner from the provided sticky pad.
2. Insert the sticky pad into the Indoor Flying Insect Trap device.
3. Plug the device into the wall socket of your choice!

When the sticky pad gets filled, simply remove it from the device, toss it in the trash, and replace it with a new sticky pad!
